

EASY PLUG® is a brand of the NGH-Werke

EASY PLUG® und EASY SLAT® are brands of the Neugerwerke Holzwerke GmbH in Saxony.

Neugerwerke Holzwerke GmbH with its plant in Neugersdorf is a specialist in the production and coating of plywood. There, plywood panels in birch, beech and poplar and HPL and CPL surfaces can be coated with all desired carrier materials.

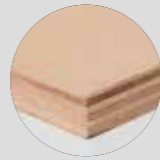

The processing and assembly centre is located at the Großröhrsdorf site. Here the elements can be processed according to special customer requirements.

Sales and marketing of the products manufactured here are carried out by the Broszeit Group, which means that sales are handled by a worldwide distribution network.

Advantages with the EASY PLUG® and EASY SLAT® Set

EASY SLAT®

EASY PLUG®

EASY SLAT® and EASY SLAT® Set

FAST & EFFICIENT

quick and easy repair of holes, scratches, anchor holes or nails in used shuttering

ECONOMICAL & EFFECTIVE

with very little effort you get smooth and faultless concrete surfaces

PROFITABLE & DURABLE

Regeneration of used shuttering through a low investment

PRECISE & UNIQUE

specially developed drills and milling cutters and 220g /m² coated repair plates ensure highest precision and therefore a perfect result, a smooth concrete surface

With the EASY SLAT® Set, and its tools specially developed for this application, scratches up to 600 mm in length can be repaired quickly and easily.

EASY SLAT® is available in variable lengths between 100 mm and 600 mm. The strips are 3.2 mm thick and coated on one side with 220g/m² phenolic resin and on the back with a waterproof film.

In order to repair larger damages, several plates had to be placed next to each other.

Due to the high precision and exact coordination of drill and platelets you get a very good result, an almost invisible edge on the concrete skin.

This prevents damage before it occurs or has to be repaired. Directly on site at the construction site.

EASY PLUG® repair plates are available in the sizes 40 mm and 60 mm available in 3.2 mm thickness

Standard is phenolic resin with a coating thickness of 220g / m² and a waterproof coating on the back! Therefore no more unwanted swelling! No more ugly marks on the concrete surface!

EASY PLUG® is available in variable surfaces and colours, e.g. also in wood-filled PP.

As all our products are 3.2 mm thick, you do not need separate tool adjustments or modifications.

This means that your used shuttering can be used for longer, saving you time and money.

Easy Slat® with all necessary tools and accessories for the repair of shuttering damage. Flexible and immediately ready for use directly on site

- Specially developed tools with cylinder head drill
- indexable inserts as well as for milling cutters for slotted holes
- Key and adjustment plate for blade change
- Router for industrial use, adapted to the tools
- Different glues like PVAC or PU glue
- Impact wood from 18 mm birch plywood
